In recent years, People started to love bikes. The interest of today's generation is increasing day by day. And some people want to convert this interest in passion. This article is dedicated to them. Before getting into this, we must know about some important information / key points...

1. A person should know their level ( **beginner, intermediate, advanced** ). It is the most important point to remember your stage.
2. Rules and Regulations.
3. Self- control.
4. Money Management.
5. Maintenance.
6. Categories.

**Now moving towards the explanation of points mentioned.....**

1. Starting with finding out the riding stage

➤ *If you are a beginner and have little knowledge about bikes and know how to ride you should go with lower CC bikes **(100-400)**.*

- *If you are an intermediate and able to ride a bike in good way, have a great control over bike, then you can move further to big CC bikes or high-performance bikes. **(400-700)***

- *If you are a professional or expert in riding bikes then you may go for the hyperbikes or we can say **1000 CC**. Because only an expert can handle the power of a superbike / hyperbike.*

**It will help you to choose the bikes according to your need. It will be safer for you as well as others.**

2. One should know all the rules and regulations about road safety and how to drive carefully. Be a careful, good and responsible rider while driving while riding bikes. *Wear all the riding gears such as riding boots, helmet, riding gloves, riding jacket and knee protectors while riding bikes.* Do not use exhausts which have a sound more than **100 decibels**. It is illegal to use exhausts which have the sound more than 100 decibels.

3. Self-control is very necessary while riding bikes. It is good to have a good bike, but it doesn't mean that we can do rash driving. It is also illegal to drive too fast. *Always Being in the limit is the most important thing.* Don't let your mind control yourself. Be the one who controls the mind.
4. One should know their budget before purchasing any bike or before making any modification. *Remember with every modification the cost of services and fuel will increase rapidly.* Stock bikes are the best if you are looking for a budget friendly bike.

5. Maintaining a bike is also a huge task for every biker. If you ride your bike in a good manner this task is very easy. But if someone is riding their bike in a bad or worst way then the bike will be damaged very quickly. So, basically maintenance depends on how a person ride their bike in different roads or climate.

6. Now, moving towards the categories of bikes-

- Casual
- Sports
- Super-sports
- Hyper-sports
- Cruising
- Bobber
- Classic
- Adventure
- Tunned / Moto GP

- **CASUAL** bikes are used to ride daily. Such as Splendor, Bullet, Pulsar and many more.

- **CRUISING / CLASSIC BOBBER** are muscle bike categories. Such as HARLY- DAVIDSON, JAWA, INDIAN.

- **ADVENTURE** bikes are for long and off-roading rides. Best example of adventure bike is R 1250 GS Adventure

- **200-1000 CC** bikes with fairing came under **SPORT / SUPER-SPORT** category.
